TIMELINE

PROJECT IDEA

How to embrace self-esteem and self-confidence in children with Congenital Upper Limbs Amputation?

PROJECT FOCUS

Gap in between governmental systems of the support and people,
lack of social awareness towards people with different disabilities.

PROJECT FOCUS

GAP BETWEEN SYSTEMS AND PEOPLE
LACK OF SOCIAL AWARENESS

ACTUALLY WHY?

Bartosz born in 2022

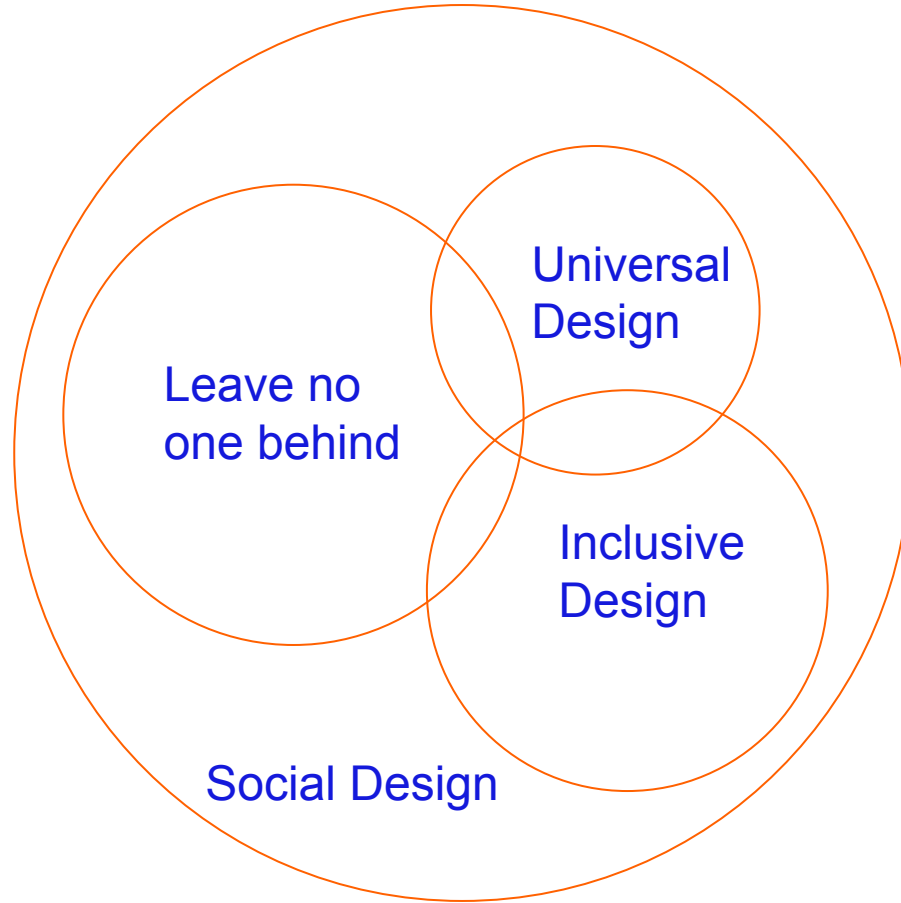

MOTIVATION

- social stigma around disabilities
- most of the educational institutions are lacking professionals with right “tools” and empathy
- Governmental systems and laws are often complicated and “hidden” for parents and caretakers of childrens with different abilities
- peers – lacking right behavior towards other peers
- Not enough of support for children and their parents in case of prosthesis.

RESEARCH TOPIC

- / Embracing self-esteem and self-confidence in children with Congenital Upper Limbs Amputation and Upper Limbs Deficiencies.
- / HandsUp – Prosthesis with super powers
- / Well-being of Children with Disabilities through Inclusive and Universal Design + parents.

Question

Does the work with local government is a key to a change?

WHAT?

Small and medium size organisation are really important in process of change.

Basic life needs and small improvements have positive impact on better quality of life and well-being in both parents and children.

Legislations can be changed by joined force of small organisations by different experiences and knowledge.

It's Time to Break Up

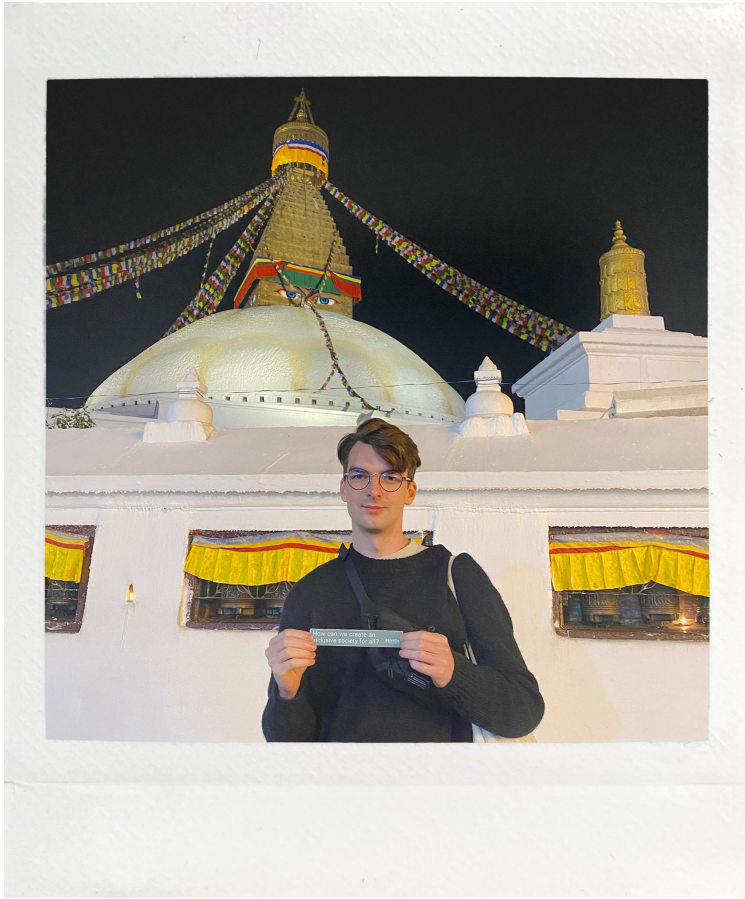

It's Time to Break Up

With Stigmatisation of Disabilities.
